

## Online exchange meeting with overseas high school students

This year, the S-TEAM Education Promotion Project held the "Research Activity Challenge Japan," which incorporated exchanges with high school students from outside Hokkaido. And next year, we plan to hold the "Research Activity Challenge Asia," which incorporates exchanges with overseas high school students, and widely spread the results of the research activities.

On March 6th 2024, "The Online Exchange Meeting" was held. Participants were students in Hokkaido and overseas, as well as students participating in the "Hokkaido and New Zealand High School Student Exchange Promotion Project". We would like to connect the efforts of this exchange meeting to "Research Activity Challenge Asia" and enhance students' inquiry-based learning in the future.

Achievement report at each school

「Research Activity ○○」

1st year 「Research Activity Hokkaido」

2nd year 「Research Activity Japan」

3rd year 「Research Activity Asia」

### The Contents of "The Online Exchange Meeting"

#### The Group Exchange

Divided into groups, introduced themselves and the culture of their countries.

#### Presentation of Research activities by global students

By the three high school students.

#### Interaction

Interaction with the whole group about the content of the discussion.

### The High Schools from Abroad

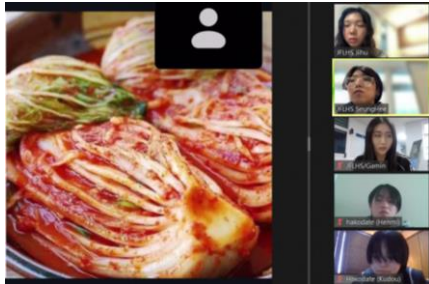

- Jeju Foreign Language High School(Korea)
- Halon High School (Vietnam)
- Wainuiomata High School(New Zealand)

After this exchange meeting, students participating in the exchange program visit New Zealand from March 9th-24th!

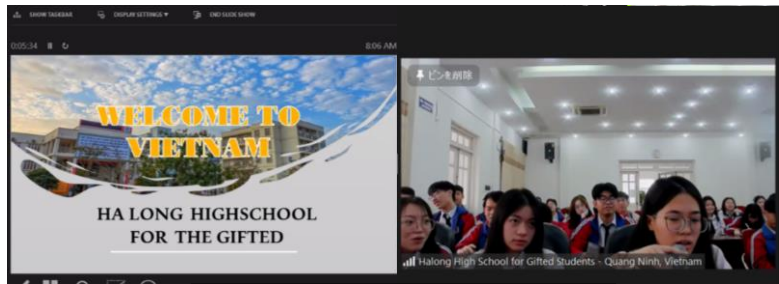

### Comments from participants

- In the group exchange, we exchanged information about the culture of each country. We had conversations in English, which is not our native language. I could realize that it's possible even if we just put words we know. We had a lot of conversations, and I really enjoyed interacting with them.
- This presentation was a very good experience for us to share the results of our research. I was able to interact with students from overseas, and this opportunity made me want to see Japan from a more global perspective.
- I was able to broaden my horizons through exchanges with people from overseas, so in next year's project, I would like to promote exploration activities with my colleagues in order to achieve the goal of making Japan a multicultural society.
- Through the meeting, I could learn about Japanese culture and the people I will be on the project with, as well as the previous research activity which was amazing. I'm grateful to be a part of this.
- I want to research what we can do for developing countries' people. For example we try to invent something they can use more easily like water filtration.
- Although it hasn't been set, I would like to work on something that affects people's life closely. As of right now, I'm mostly interested in education or languages.
